

easyBANF for Simple and Efficient Purchase Requisition

Challenge & Solution

The procurement process is one of the most important and time-consuming processes within the administration to date. Among other things, because many order requirements are decentralized.

With easyBANF, you can take the procurement process to a new level. Thanks to the digital solution, the previously complex procedure will be streamlined and made much more effective.

The solution based on SAP Fiori is intuitive to use, can be used from anywhere and offers end-to-end service without media discontinuity.

The easyBANF app is a modern and user-friendly SAP application for notification of requirements and approval of requirements, with a focus on integration into standard SAP processes, among other things.

Advantages & Benefits

- + Mapping of the complete procurement process
- + Easy to use thanks to SAP Fiori-based, convenient user interfaces that can be easily adapted to the customer's needs, e.g. display of information texts
- + Application for large number of users
- + Flexible and configurable approval process per requirement notification type and/or catalog

- + Easy integration of external supplier catalogs or catalog platforms via OCI interface
- + Standard solution plus option for customer specific customization
- + Access from anywhere (standard PC desktops, tablet, smartphone)
- + SAP integrated solution (e.g. with regard to administration, or module integration MM, FI, CO, PSM)
- + Customer specific form-based needs assessment
- + Customer network for exchange

Our services

With easyBANF, we offer you a standardised procurement solution based on the fit-to-master principle. GISA takes over the project management and accompanies you from conception to implementation. We rely on proven methods to make the switch to a procurement solution as fast as possible. After implementation, we continue to provide support so that future product developments can be seamlessly integrated.

To ensure that your employees are optimally prepared for the new solution, we train your administrators and provide training documents – usually videos – on request.
